

Product Announcement

March 3rd, 2020

Subject: Pumps

Permaswage is pleased to announce that we are no longer taking new orders for older generation pumps such as DLT03, DLT06, etc. Any new orders will be for the new pumps, which are safer, more reliable and easier to maintain.

For years to come, we will continue to innovate and design solutions for our customers to ensure individual needs are met.

# Preferred Pumps & Kits

## MANUAL PUMP KIT

Pressure build up with less force due to double valve design

Quick store away of hydraulic hose assembly

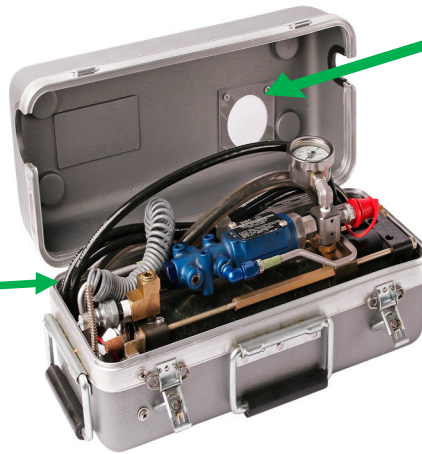

Durable box assembly with easy to use double latch

Easy to read pressure gage with green/red zone bands

## PNEUMATIC PUMP KIT

Box with hose assembly cut-outs for safety during swage

View window for pressure reading during swaging

Foot operated pedal

## BATTERY PUMP KIT

High yield rechargeable Lithium Ion battery with LED indicators for battery life

Controller storage

Swivel port with cap attachment for ease of use
